In short

I find myself *an experienced back-end developer*, who is also much curious about the new technologies and approaches in solving tasks. I enjoy being challenged and engaging with projects that require me to work outside of my comfort zone and knowledge set, as continuing to improve my *skills* and *development techniques*.

I spend lots of time reading technical literature and on the computer researching new development approaches and improving my skills. I enjoy *debugging* and *fixing complex issues* as that's what keeps my mind sharp and hungry for new challenges suitable to test apply the newly learned skills and techniques.

Profile

8+ years of experience with *WordPress*
4+ years of experience with *Laravel* and *Symfony*
2+ years of experience with *TS.ED* and *TypeORM*
Extensive experience in *software development*
Experienced *Back-End developer*
Experience in creating *API services*
Experience in integrating with *Third-Party services*
Great *troubleshooting skills*
Strong *work ethic*
